SUMMARY

Technical & Solutions Engineer with over 4 years of experience with hands-on coding, debugging, and building in production cloud environments in AWS. Now leveraging strong Python, Cloud and JavaScript skills to build full-stack web applications. AWS Certified Developer, Solution Architect and Lambda SME bringing a unique combination of cloud infrastructure knowledge and hands-on coding experience. Eager to apply proven problem-solving, adaptability, and fast learning to an engineering team.

EXPERIENCE

Cloud Support Engineer II - L5 | Amazon Web Services

JUNE 2023 - NOV 2024, Dublin, Ireland

- Built and maintained Python automation scripts and internal tools using the AWS SDK which helped resolve over 200 customer workflows.
- Managed and lead multiple internal projects for service improvements, training, documentation and scripts as part of Lambda SME responsibilities which deflected 10% of cases and improved engineer workflows.
- Gained further experience with the AWS CDK, AWS SDK, and AWS CI/CD.
- Authored knowledge base articles, conducted global training sessions, and mentored engineers - contributing to five additional Lambda SME's and over 8,000 article views.
- Collaborated with AWS service teams to resolve critical customer incidents and influence service improvements.
- Resolved complex infrastructure and orchestration challenges by optimizing Serverless Workflows and systematically troubleshooting integrations with AWS Lambda, API Gateway, Step Functions, SNS, SQS, Cloud9, Connect, Mainframe Modernization, and both managed and self-managed Kafka.

CLOUD SUPPORT ENGINEER I - L4 | AMAZON WEB SERVICES

MAY 2021 – JUNE 2023, Dublin, Ireland

- Received AWS 'Most Valuable Player Award' out of 60+ engineers for outstanding technical contributions, productivity, and mentoring contributions that elevated team standards.
- Expanded expertise in AWS architectures and services, handling more complex customer cases involving event-driven architectures and microservices.
- Accredited as Lambda Subject Matter Expert (SME), supporting advanced use cases, optimizations, and troubleshooting for AWS Lambda functions.

CLOUD SUPPORT ASSOCIATE - L4 | AMAZON WEB SERVICES

JULY 2020 – MAY 2021, Dublin, Ireland

- Developed foundational expertise in AWS services, with a focus on Serverless - AWS Lambda, API Gateway, and Step Functions.
- Advanced to Engineer within 10 months, exceeding standard promotion timeline through demonstrated technical depth and ownership.

EDUCATION

Postgraduate Professional Diploma in Practical AI for Software Developers | University of Galway

Galway, Ireland, September 2025 - Expected May 2026

- Python, NumPy/Pandas/Matplotlib, and ML tooling workflows.
- Supervised learning, model evaluation, linear and probabilistic models.
- MLOps concepts: packaging, serving, and optimizing models for different environments.
- Critical analysis of AI impact and technology readiness.

BSc (Honours) Computer Science Infrastructure | (TUD) Technological University Dublin, Kevin Street Campus

Second Class Honours, Dublin, Ireland, 2020

- Full-stack development across mobile and enterprise platforms with expertise in object-oriented programming, database design, web deployment, and DevOps automation (Python, C, C#, Java, HTML, CSS, JavaScript).
- Networking advanced protocols, network programming, cryptography, cybersecurity, forensics, and IT infrastructure security.
- Proficiency in OS administration, database design and management, system infrastructure architecture, and enterprise-level deployment environments, Azure.

Placement Abroad - Scholarship | Hanyang University

Seoul, South Korea, 2018

- Awarded competitive scholarship for semester exchange at Hanyang University, Seoul, South Korea.
- Completed advanced coursework in computer networking, linear algebra, and C# game development using Unity Engine.
- Achieved beginner-level Korean language proficiency through immersive cultural experience.

CERTIFICATIONS

AWS Certified Developer – Associate

AWS Certified Solutions Architect - Associate

AWS Lambda Subject Matter Expert (SME)

SKILLS

Programming & Scripting: Python, TypeScript, JavaScript, React, Express.js, Node.js, HTML, CSS, Git

Cloud & Infrastructure: AWS Cloud, Serverless, Monitoring, AWS CDK, CloudFormation, Serverless Application Model (SAM), Terraform, Docker, Apache Kafka, REST APIs

Databases: PostgreSQL, Amazon RDS, DynamoDB, MongoDB

Languages: English, Polish, Korean

Soft Skills: Mentoring, Online Presentations, Technical Documentation, Knowledge Base Authoring, Public Speech
